

TOWNHOUSE

Salon Kiosk Technology | Automate Front-of-House | Operator-Built for Multi-Site Beauty Operators

For multi-site beauty operators, front-of-house labor is one of the largest controllable costs per location, and one of the hardest to keep consistent across every site. Our kiosk automates the admin (check-in, walk-in booking and consent forms) freeing your teams to focus on interactions that actually drive revenue. Proven at scale across leading multi-location beauty brands on Zenoti.

WHAT IT DOES

- Automated check-in & walk-in booking** – removes admin from your floor so teams can focus on meaningful interactions & upselling.
- Zenoti-integrated** - seamless connection to your existing salon management platform
- Centrally managed SaaS** - real-time monitoring, remote updates, full analytics across every location
- Designed for multi-site growth** – seamless multi-site rollout with a consistent, high-quality guest experience at every location
